LIST OF TABLES

INTRODUCTION

This dissertation describing the Master's work developed in the context of *Mestrado em Engenharia Informática (MEI)* held at *Departamento de Informática (DI), Universidade do Minho (UM)*.

Context,

motivation,

main aims (objectives)

research hypothesis, (optional)

paper organization!

Here is the first reference to an acronym: *Quality of Service (QoS)*.

And now the same acronym is referenced by the second time: *QoS* !

STATE OF THE ART

State of the art review; related work

TESTEEEEEEEEEEEEEEEEEEEE

2.1 BASICS/BACKGROUND/RELATED WORK

Example of a citation where the author should be cited directly on the text like, the work of [Goossens et al. \(1997\)](#), on producing \LaTeX files with [BibTeX](#) references.

Another way of citing without a direct mention to the author can be used like the work done on C language ([Kernighan and Ritchie, 1988](#)).

2.2 SUMMARY

2.2.1 *Conceptual map (Optional)*

You may wish to use the [Concept-Explorer](#) tool.

THE PROBLEM AND ITS CHALLENGES

The problem and its challenges.

3.1 PROPOSED APPROACH - SOLUTION

In this section, it is presented various ways to display an image.

3.1.1 *System Architecture*

A block diagram of the planned system / approach

Here we have an example of inserting an image between the text paragraphs.

Here we have how an image can be wrapped into the text without having surrounding space, and taken advantage of the space to be disposed on the side, without breaking the text readability.

This approach also benefits from the fact that the text will be related implicitly to the image on its side, although the it should be referenced on the text anyway, otherwise, it should be consulting to perceive to which paragraph the image is related to.

Here is how we place an image as floating body. Take in attention that the image is displayed on the next page, because there's no more room in this page.

You can also use an image as an icon, eg. , in the main text. Click on it to visit the website. It is also listed in the list of terms. Another example of an item to appear in the term index:

Figure 1: caption

DEVELOPMENT

4.1 DECISIONS

4.2 IMPLEMENTATION

4.3 OUTCOMES

Main result(s) and their scientific evidence

4.4 SUMMARY

CASE STUDIES / EXPERIMENTS

Application of main result (examples and case studies)

5.1 EXPERIMENT SETUP

5.2 RESULTS

5.3 DISCUSSION

5.4 SUMMARY

CONCLUSION

Conclusions and future work.

6.1 CONCLUSIONS

6.2 PROSPECT FOR FUTURE WORK

BIBLIOGRAPHY

Michel Goossens, Sebastian Rahtz, and Frank Mittelbach. *The LaTeX Graphics Companion*. Addison-Wesley, 1997. ISBN 0-201-85469-4.

SUPPORT MATERIAL

Auxiliary results which are not main-stream; or

Details of results whose length would compromise readability of main text; or

Specifications and Code Listings: should this be the case; or

Tooling: Should this be the case.

NB: place here information about funding, FCT project, etc in which the work is framed. Leave empty otherwise.
